

**REMARKS**

Applicant presents the foregoing replacement paragraph in the specification and the foregoing set of claims for entry. Regarding the specification, the only change made is to insert - - generally spherical, hemispherical or partially spherical - - before "cap" at line 6 of the first full paragraph on page 17 to make clear that the passage refers to the preferred embodiment mentioned in the preceding sentence. The only change to the claims is to make "caps" singular in claim 37 (which is consistent with the previous recitation of a single cap). The changes are needed for purposes of clarity, the subject matter remains patentable, and the amendments were not presented earlier through inadvertence. Entry is therefore proper under Rule 312 and respectfully requested.

Respectfully submitted,

**KING & SCHICKLI, PLLC**
